SKILLS

Languages: JavaScript, Python.

Framework: React, React Native, Next JS, Node JS, Fast Api.

Dev Tools: Git, Postman, Jira, Figma, Cursor, Claude Code, Anti-Gravity.

Libraries: Bootstrap, Tailwind, Fabric JS.

PROJECTS

TubeSpanner Thumbnail Editor | *React, Fabric JS*

- Engineered a web-based application, **TubeSpanner Thumbnail Editor**, to streamline thumbnail creation for digital content platforms.
- Developed a responsive, component-based front-end using **React.js**, implementing drag-and-drop editing, real-time rendering, and image/text customization features.
- Optimized application performance through efficient state management and rendering techniques, achieving up to **30% faster load and interaction times**.
- Built export functionality and applied UI/UX best practices to deliver a scalable, user-friendly interface for creating high-quality thumbnails efficiently.

TubeSpanner Browser Extension | *React, webpack, Fabric JS*

- Engineered a **TubeSpanner Browser Extension** to enhance video browsing by enabling quick thumbnail customization and content interaction directly within the browser.
- Developed the extension using **JavaScript, HTML, and CSS**, integrating with browser APIs to manipulate DOM elements and provide seamless in-page editing features.
- Implemented performance optimizations and efficient event handling, achieving up to **25–30% faster interaction response time** and improved runtime efficiency.
- Designed an intuitive and lightweight UI, ensuring minimal resource consumption while delivering a smooth and user-friendly experience across web platforms.

Period Bear | *React-native*

- Engineered **Period Bear**, a cross-platform mobile application for menstrual cycle tracking and health awareness, aimed at improving user engagement and accessibility to essential health insights.
- Developed the app using **React Native**, implementing features such as cycle tracking, reminders/notifications, and educational content for user awareness.
- Integrated efficient state management and optimized component rendering, achieving up to **25–35% improved app performance** and smoother navigation across devices.
- Successfully deployed the application on the **Google Play Store**, ensuring production readiness, responsive UI/UX, and reliable performance for end users.

EXPERIENCE

Saturn Production *freelancer*

Jul 2021 – Feb 2024

- Delivered scalable web and mobile applications using **HTML, CSS, JavaScript, React.js, and React Native**, meeting diverse client requirements and improving overall client satisfaction.
- Collaborated with cross-functional teams, including designers and backend developers, to build high-quality, user-centric products.
- Implemented **responsive and mobile-first design principles**, ensuring seamless user experience across multiple devices and screen sizes.
- Conducted code reviews and applied best coding practices, enhancing code quality, maintainability, and performance.

Cyber Infrastructure *Junior Developer*

April 2024 – Perusing

- Developed and maintained web and mobile applications using **React.js, React Native, and modern JavaScript**, contributing to scalable and efficient product development.
- Partnered with designers, QA engineers, and senior developers to deliver robust, production-ready applications.
- Optimized UI performance and implemented **responsive design techniques**, improving usability and cross-platform consistency.
- Participated in peer code reviews and debugging processes, ensuring high-quality code standards and reducing defects.

EDUCATION

Acropolis Institute of Technology and Research

Current CGPA: 8.09

Bachelor in Technology Information Technology
